

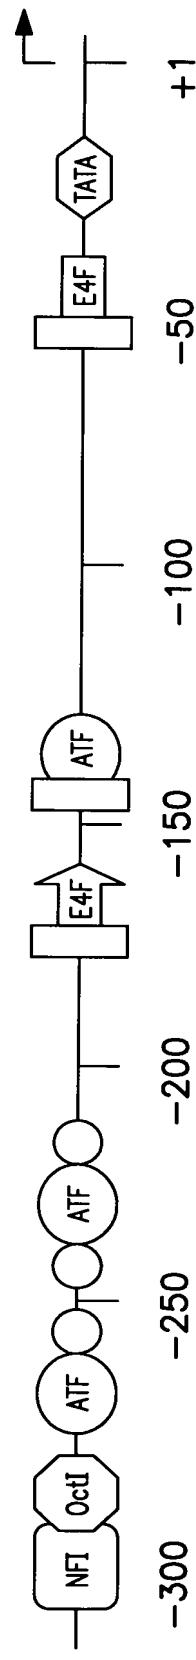

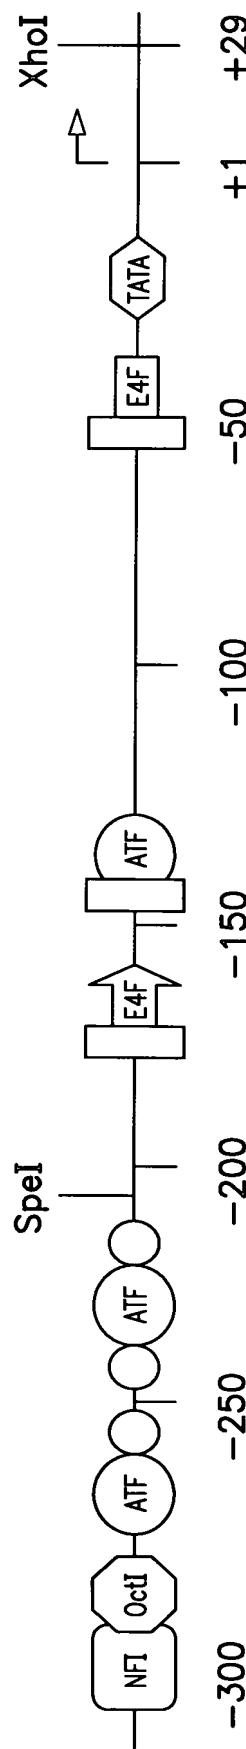

FIG. 1

Symbol Legend:

- NF1 binding site centered around -300
- Oct1 binding site positioned near -285
- ATF binding sites near -260, -230, and -140
- Sp1 binding sites near -255, -240, and -220
- E4F binding sites near -165 and -50
- E4TF1 binding site positioned around -140
- TATA box positioned near -30
- transcriptional start site denoted as +1
- E4F inverted repeat binding sites near -165 and -50

FIG. 2

Nucleotide Alterations
